## How the Smart Tool-Setter Works:

### Mounting

Mount the Smart Tool-Setter on a solid workbench. Use the 4 holes provided on the base to bolt down the Smart Tool-Setter.

### Holder Loading

Put holder in while locking knob is in unlocked position. Rotate locking knob to locked position to lock holder on the "V" groove located on the diameter of the holder. Locking knob positively locks the tool in and does not allow tool to come out of place.

### Application

The Smart Tool-Setter's precise and heavy duty construction makes the tool-setter very rigid and able to endure extreme forces without causing any damage to tools or the Smart Tool-Setter. The multi-functioning and positioning of the Smart Tool-Setter allow the operator to switch quickly and easily from one operation to another without loss of time.

### Small Tool Change

Endmills can be easily, quickly, and precisely set with the Smart Tool-Setter.

### Large Tool Change

Large tools can be mounted or removed with the Smart Tool-Setter.

### Positioning

Vertical

Horizontal Left Hand

Horizontal Right Hand

Pull the indexing knob to unlock, turn into a new position, and release the indexing knob to lock.

### Pull Stud Change

Pull Studs can be quickly and easily changed using the Smart Tool-Setter.
